This is a corrected report, on 06/13/2016 the appraiser was requested to make the following:

****Appraiser to confirm which closed comps are located in the same subject's subdivision.**

Appraiser's response:

Comparable sales #1 and #4 are the most recent model match sales located within the subject's subdivision. Listing comparable sales #1 and #2 are also recent similar sales.

Signature date reflects the date of these changes.

Uniform Residential Appraisal Report

Appraisal #165-00556
File # Fha #332-6343683-703

The purpose of this summary appraisal report is to provide the lender/client with an accurate, and adequately supported, opinion of the market value of the subject property.

Neighborhood Description The subject is located in a residential area where homes are reasonably compatible, street patterns are good, sites are adequate and the subject is typical for the neighborhood. No neighborhood factors were noted that would adversely affect the subject property. All facilities such as shopping, employment centers and recreational areas are all in average proximity the neighborhood. Other is considered vacant land, public parks, schools & Market Conditions (including support for the above conclusions) Properties within the appraisers search criteria indicates property values to be stable. Supply is in balance with demand and marketing times are under 3 months. Prevailing interest rates are ranging from 3% to 7%. Sellers are paying from 0 to 6 discount points in the marketing of their homes. See marketing conditions within 1004 mc form and addendum for further detailed analysis.

Additional features (special energy efficient items, etc.).			See addendum and pictures for detailed list of amenities.																																																																								
Describe the condition of the property (including needed repairs, deterioration, renovations, remodeling, etc.). C3;No updates in the prior 15 years;Please Note: Computer generated update comment refers specifically to the kitchen and baths. Please refer to condition rating in addendum. The quality of construction is considered to be average and consistent with other dwellings in the area. Maintenance and condition of the improvements are considered to be in good with excellent upgrades with the subject having upgraded laminate wood flooring, upgraded cabinetry, cultured marble wainscoting, etc. (see addendum and photos). Utilities were observed on.																																																																											
Are there any physical deficiencies or adverse conditions that affect the livability, soundness, or structural integrity of the property? ☒ Yes ☐ No If Yes, describe																																																																											
No physical or functional conditions were noted. The appraiser is not a home inspector and make no false representation to be one. If further assurance is needed a home inspection is recommended. The observable surfaces of the roof were visually inspected from ground level. Smoke detectors are on site and appear to be in functioning condition. The subject meets the minimum FHA/Hud standards and is considered insurable.																																																																											
Does the property generally conform to the neighborhood (functional utility, style, condition, use, construction, etc.)? ☒ Yes ☐ No If No, describe																																																																											
The subject property conforms well with the market area. Adverse external factors or influences were unperceived at inspection.

I ☒ did ☐ did not research the sale or transfer history of the subject property and comparable sales. If not, explain	
The below is a 36 month sales history for the subject and comparable sales.	
My research ☒ did ☐ did not reveal any prior sales or transfers of the subject property for the three years prior to the effective date of this appraisal.	
Data Source(s) GLVAR/County records	
My research ☒ did ☐ did not reveal any prior sales or transfers of the comparable sales for the year prior to the date of sale of the comparable sale.	
Data Source(s) GLVAR/County records	
Report the results of the research and analysis of the prior sale or transfer history of the subject property and comparable sales (report additional prior sales on page 3).	
ITEM	SUBJECT
Date of Prior Sale/Transfer	04/30/2014
Price of Prior Sale/Transfer	\$190,000
Data Source(s)	GLVAR/County records
Effective Date of Data Source(s)	05/23/2016
Analysis of prior sale or transfer history of the subject property and comparable sales	
The 04/30/2014 transfer of the subject was a distressed short sale that was on the market for over 278 days. Since this transfer the subject appears to have been updated with wood plantation shutters, new interior paint, new baseboards and laminate wood flooring throughout. This previous transfer has little relevance to current market value.	
***County records reports the living area to be 1891 square feet. However after measurements the actual livable area is 1894.	
Summary of Sales Comparison Approach	
All 5 selected comparable sales and 2 listings are in the subjects' competitive market area and utilized within this report as they are considered to be the most appropriate for comparison to the subject property as of the effective date of this assignment. All positive and negative adjustments of the comparable sales were required in areas of dissimilarity to produce the best indicated value of the subject. Comparable sales #1 and #4 are the most recent model match sales located within the subject's subdivision. Comp #1 is however inferior in condition and upgrades having little to no updates with standard carpeting and cabinetry. Comp #4 is superior in concessions; inferior in being adjacent to the neighborhood through street of Huntington Cove. Comparable sales #2 and #5 are additional sales located within the subject's subdivision that are slightly superior in living area with comp #2 also superior in lot size and comp #5 superior in concessions, and covered patio/balcony. Comp #3 is the most recent similar sale located within the closest competitive subdivision that has homes similar in size, style, age, and quality. This sale is superior in concessions and covered patio. Most weight is given to comps #1, #2, and #3. Comps #4 and #5 are slightly dated and given least weight. The opinion of value falls within the original and adjusted sale prices of the comparable sales provided.	
Indicated Value by Sales Comparison Approach \$ 235,000	
Cost Approach (if developed) \$ 215,306	
Income Approach (if developed) \$	
The income approach was not applicable or necessary for this report due to the limited sales data of typical arms length transactions that are rental properties that would derive a reliable gross rent multiplier. Due to the age of subject the cost approach has no credence in this report and was completed per lender requirements. Major reliance and consideration is placed on the sales comparison approach as this approach best reflects the behaviors and action of the buyers and sellers in the market.	
This appraisal is made ☒ "as is", ☐ subject to completion per plans and specifications on the basis of a hypothetical condition that the improvements have been completed, ☐ subject to the following repairs or alterations on the basis of a hypothetical condition that the repairs or alterations have been completed, or ☐ subject to the following required inspection based on the extraordinary assumption that the condition or deficiency does not require alteration or repair. This appraisal report is based on "as is" condition with no consideration for future improvements.	
Based on a complete visual inspection of the interior and exterior areas of the subject property, defined scope of work, statement of assumptions and limiting conditions, and appraiser's certification, my (our) opinion of the market value, as defined, of the real property that is the subject of this report is \$ 235,000 , as of 05/24/2016 , which is the date of inspection and the effective date of this appraisal.	

Uniform Residential Appraisal Report

Appraisal #165-00556
File # Fha #332-6343683-703

ADDITIONAL COMMENTS	Fee/AMC disclosure: \$325.00; AMC fee: \$125.00; AMC registration #: AMC.0000010			
	Previous Inspections or Services: I certify that, to the best of my knowledge and belief: I William E. Kincheloe have not performed an appraisal or any other prior services regarding the subject property, as an appraiser, or in any other capacity, within the 3 year period immediately preceding acceptance of this appraisal.			
	Exposure Statement: The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of an appraisal; a retrospective opinion based on an analysis of past events assuming a competitive and open market. The appraiser has determined that the property would have to be exposed for 0 to 90 days on the open market in order to have a market value of \$235,000.00 on the effective date of this appraisal.			
	FIRREA Statement: The appraiser certifies and agrees that this appraisal was prepared in accordance with the requirements of Title XI of the Financial Institutions, Reform, Recovery, and Enforcement Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.), and any applicable implementing regulations in effect at the time the appraiser signs the appraisal certification.			
	Search Parameters:			
	Actual Close Date: 12 months Back			
	Property Type: Single Family Residential			
	Status: ER, EA, C, P, S			
	Living Area: between 1700sf and 2100sf			
	Bldg Desc: 2 story; tri-level			
COST APPROACH	Lot sqft: is less than 5000			
	Built between: 1997 and 2012 and is not guard gated or located in a golf course community			
	Market Area: Map search of neighborhood boundaries stated on page 1			
	This search derived the 86 closed sales and 26 listings reported within the 1004 mc form.			
	Adjustments given to comparables: concessions: 1% of sales price for every point contributed to sale			
	lot size: \$1.00 per square foot in excess of 1000 square feet			
	condition: \$5,000.00 for each condition rating per mls comments and pictures.			
	living area: \$30.00 for every square foot in excess of 100 square feet			
	porch/patio/deck: \$2,000.00 for patio cover and \$1,000.00 for balcony			
	upgrades: \$5,000.00 for interior upgrades including flooring, cabinetry, built-ins, wainscoting, etc. per mls comments and pictures			
INCOME	***Whenever possible and accurate, direct paired sales were used to determine adjustments. However, when direct paired sale are not available, the adjustments used is based off the market history of similar adjustments in similar situations. The items that were given a 0 within sales grid are differences that appear not to have a weighable influence in values, at this time. All adjustments were rounded to the nearest \$100.			
	Opinion below the contracted price: The appraiser is aware the opinion of value is below the contracted sales price. This is unavoidable due to the limited sales data of homes similar in size, style, and lot size that would support such a price. The appraiser has provided the most recent sales similar to the subject that bracket the subject's difference with the opinion of value falling within their original and adjusted sale prices.			
	COST APPROACH TO VALUE (not required by Fannie Mae)			
	Provide adequate information for the lender/client to replicate the below cost figures and calculations.			
	Support for the opinion of site value (summary of comparable land sales or other methods for estimating site value)			
	Due to the age of the subject the cost approach has no credence in this report and was only completed per lenders requirements. Direct paired sales analysis of the most recent vacant lots within the subject's subdivision were used to derived the site value. Replacement costs used in the cost approach are used for valuation purposes only.			
	ESTIMATED ☐ REPRODUCTION OR ☒ REPLACEMENT COST NEW			
	Source of cost data See below			
	Quality rating from cost service Ave Effective date of cost data 2016			
	Comments on Cost Approach (gross living area calculations, depreciation, etc.)			
PUD INFORMATION	The cost approach has been completed through Marshall swift and appraisers previous work files of properties similar in size and quality of construction. Costs have been rounded to the nearest dollar.			
	Lump Sum (upgrades)			
	Garage/Carport 414 Sq.Ft. @ \$ 20.00 = \$ 8,280			
	Total Estimate of Cost-New = \$ 197,528			
	Less Physical Functional External			
	Depreciation 22,222 = \$(22,222)			
	Depreciated Cost of Improvements = \$ 175,306			
	Remaining economic life is estimated to be 70-75 years.			
	Effective age: 9 years; economic life 80 years; actual age: 9 yrs			
	"As-is" Value of Site Improvements = \$ 10,000			
Estimated Remaining Economic Life (HUD and VA only) 71 Years				
INDICATED VALUE BY COST APPROACH = \$ 215,306				
INCOME APPROACH TO VALUE (not required by Fannie Mae)				
Estimated Monthly Market Rent \$ 0 X Gross Rent Multiplier 0 = \$ Indicated Value by Income Approach				
Summary of Income Approach (including support for market rent and GRM)				
The income approach was not applicable or necessary for this report due to the limited sales data of typical arms length transactions that are rental properties that would derive a reliable gross rent multiplier.

Comments: **PUD information:** The subject is located within a pud that has an HOA due of \$43.00 each month (per MLS) these fees include: CCRS, common area/green belt and maintenance of these areas which are suggested to be in a good condition. Comparable sale #1, #2, #4, #5, listing #1 and listing #2 are all located within the subject's PUD. The appraiser is not aware of any known covenants, conditions and or restrictions that are reported within mls or a available data source therefore it is suggested to have typical CC&R's which have little effect on the marketability. The appraiser was not given a subdivision cert. or PUD documents and is unable to gain access to them. It is not within the appraisers' scope of work to analyzed private street agreements and is assumed all maintenance and repair of the private roads are the responsibility of the subject PUD. Comparable sale #3 is located within a similar HOA that has \$38.00 per month and is suggested to have similar amenities. PUDs are a matter of personal preference with the more amenities; the higher the month dues. There is little to no justifiable data to determine a price or marketability difference based on PUDs and/or their amenities, at this time.

Per Fannie Mae Selling Announcement SEL-2014-16: "As a result of an analysis of Uniform Appraisal Dataset data specific to comparable adjustments, Fannie Mae has eliminated the 15% net and 25% gross adjustment guidelines and has provided clarification with respect to Fannie Mae's expectations for the appraiser to analyze the market for competitive properties and provide appropriate market based adjustments without regard to limits on the size of the adjustments.

Market Allowance adjustment: 0% adjustment if given to the active listings per the 1004 mc forms median sales price as a % of list price.

Uniform Residential Appraisal Report

Appraisal #165-00556
File # Fha #332-6343683-703

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Uniform Residential Appraisal Report

Appraisal #165-00556
File # Fha #332-6343683-703

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
11. I have knowledge and experience in appraising this type of property in this market area.
12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Market Conditions Addendum to the Appraisal Report

Appraisal #165-00556
File No. Fha #332-6343683-703

The purpose of this addendum is to provide the lender/client with a clear and accurate understanding of the market trends and conditions prevalent in the subject neighborhood. This is a required addendum for all appraisal reports with an effective date on or after April 1, 2009.

Property Address **689 Haunts Walk Ave** City **Las Vegas** State **NV** ZIP Code **89178**

Borrower **Blong, John P & Blong, Stephen/Fha #332-6343683-703**

Instructions: The appraiser must use the information required on this form as the basis for his/her conclusions, and must provide support for those conclusions, regarding housing trends and overall market conditions as reported in the Neighborhood section of the appraisal report form. The appraiser must fill in all the information to the extent it is available and reliable and must provide analysis as indicated below. If any required data is unavailable or is considered unreliable, the appraiser must provide an explanation. It is recognized that not all data sources will be able to provide data for the shaded areas below; if it is available, however, the appraiser must include the data in the analysis. If data sources provide the required information as an average instead of the median, the appraiser should report the available figure and identify it as an average. Sales and listings must be properties that compete with the subject property, determined by applying the criteria that would be used by a prospective buyer of the subject property. The appraiser must explain any anomalies in the data, such as seasonal markets, new construction, foreclosures, etc.

Inventory Analysis	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)	44	23	22	☐ Increasing	☐ Stable	☒ Declining
Absorption Rate (Total Sales/Months)	7.33	7.67	7.33	☐ Increasing	☒ Stable	☐ Declining
Total # of Comparable Active Listings	17	18	26	☐ Declining	☐ Stable	☒ Increasing
Months of Housing Supply (Total Listings/Ab.Rate)	2.3	2.3	3.5	☐ Declining	☐ Stable	☒ Increasing
Median Sale & List Price, DOM, Sale/List %	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Median Comparable Sale Price	\$213,250	\$207,500	\$223,000	☒ Increasing	☐ Stable	☐ Declining
Median Comparable Sales Days on Market	21	36	36	☐ Declining	☒ Stable	☐ Increasing
Median Comparable List Price	\$219,900	\$223,444	\$216,500	☐ Increasing	☐ Stable	☒ Declining
Median Comparable Listings Days on Market	34	49.5	43.5	☐ Declining	☒ Stable	☐ Increasing
Median Sale Price as % of List Price	99.07%	99.27%	100.00%	☒ Increasing	☐ Stable	☐ Declining
Seller-(developer, builder, etc.)paid financial assistance prevalent?	☒ Yes ☐ No			☐ Declining	☒ Stable	☐ Increasing

Explain in detail the seller concessions trends for the past 12 months (e.g., seller contributions increased from 3% to 5%, increasing use of buydowns, closing costs, condo fees, options, etc.).

33% of the above sales sold with concessions from 0% to 3%. 21% of the sales sold for cash. The seller concession trend is suggested to be stable. Seller concessions are adjusted to approximate the market's reaction to the concessions.

Are foreclosure sales (REO sales) a factor in the market? ☐ Yes ☒ No If yes, explain (including the trends in listings and sales of foreclosed properties).

Out of the 89 sales and 26 listings reported above, 7% of the sales were reo foreclosure sales or short sales subject to bank approval and 23% of the listing inventory are bank controlled listings. The subject's market area is slightly influenced by distressed sales yet value is not driven by them. The comparables provided are considered to be the best indicators of current market value.

Cite data sources for above information. The above inventory analysis has been derived from the multiple listing service. Tax records and mls were analyzed to report foreclosure trends.

Summarize the above information as support for your conclusions in the Neighborhood section of the appraisal report form. If you used any additional information, such as an analysis of pending sales and/or expired and withdrawn listings, to formulate your conclusions, provide both an explanation and support for your conclusions.

The above analysis includes closed and pending sales, expired and withdrawn listings and listing which were temporarily off the market to indicate the amount of listings and/or sales per period. Each data period has been analyzed to determine if the trend is declining, stable, or increasing. The conclusion reached is based on analyzing the last 12 months, however most weight was given to the most recent 3 month period as it suggests the most recent market trends. It appears the subjects market area is stable with sale prices slightly increasing and listing prices showing a decline. Months of housing supply is at 3.5 months and increasing which suggests supply to be in balance with demand. Median DOM is under 90 days and stable from the previous columns, marketing time is reported to be under 3 months.

If the subject is a unit in a condominium or cooperative project, complete the following:

Project Name:

Subject Project Data	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)				☐ Increasing	☐ Stable	☐ Declining
Absorption Rate (Total Sales/Months)				☐ Increasing	☐ Stable	☐ Declining
Total # of Active Comparable Listings				☐ Declining	☐ Stable	☐ Increasing
Months of Unit Supply (Total Listings/Ab.Rate)				☐ Declining	☐ Stable	☐ Increasing

Are foreclosure sales (REO sales) a factor in the project? ☐ Yes ☐ No If yes, indicate the number of REO listings and explain the trends in listings and sales of foreclosed properties.

Summarize the above trends and address the impact on the subject unit and project.

File No. Fha #332-6343683-703

Borrower	Blong, John P & Blong, Stephen/Fha #332-6343683-703				
Property Address	689 Haunts Walk Ave				
City	Las Vegas	County	Clark	State	NV
				Zip Code	89178
Lender/Client	Venta Financial Group				

Fha #332-6343683-703

Fee/AMC disclosure: \$325.00; AMC fee: \$125.00; AMC registration #: AMC.0000010

Previous Inspections or Services: I certify that, to the best of my knowledge and belief: I William E. Kincheloe have not performed an appraisal or any other prior services regarding the subject property, as an appraiser, or in any other capacity, within the 3 year period immediately preceding acceptance of this appraisal.

Intended users: The intended use of this report is to support the underwriting requirements for an FHA-insured mortgage. The intended users of this appraisal report are the lender/client and Fha/Hud. No additional intended use or users are identified by the appraiser.

Function of this appraisal: This appraisal was prepared in processing an FHA insured loan request using the subject property as collateral.

Neighborhood Boundaries: The subject of this report is located in a residential community South of central Las Vegas in the city of Henderson. The subject is typical for its market area. The market area boundaries tend to be Windmill Ln to the North, Blue Diamond Rd to the South, Decatur Blvd to the East and Grand Canyon to the West. No adverse conditions were noted.

The reader needs to be aware that Fannie Mae Form 1004/Freddie Mack Form 70 contains the word "neighborhood" which is in reference to the subjects "market area."

Market Area Description: The subject is located in a residential community where homes are reasonably compatible. Street patterns are good, sites are adequate and the subject is typical for the neighborhood. The neighborhood area consists of primarily good to average construction, 1 story and 2 story single family homes. Commercial activity is located along major traffic arteries. Other is considered to be vacant land, public parks, schools, recreational facilities, and other government/public owned land. All facilities such as shopping, schools, transportation, employment centers and recreational areas are all in good proximity to the subject's neighborhood. Overall, this area is considered to be an average to good marketable area. No neighborhood factors were noted that would adversely affect the subject property. Negative external factors or influences were unperceived at inspection.

The information reported within the "One Unit Housing Trends" is reflective of the "Sub-Market". The subject's sub market are of properties defined within the search parameters that are similar to the subject and in the opinion of the appraiser viable substitute to value, which is consistent with the 1004 mc form. The data reported within the neighborhood characteristics, one unit housing (prices and ages) and present land use is representative of the "General Market Area" which is comprised of all available data within the neighborhood boundaries stated on page 1 and not limited to similar properties.

Market condition: No unusual discounts, buy down or concessions appear to be prevalent at this time. Closing costs of 1 to 6 points paid by the seller is common. It appears the subjects market area is stable with sale prices slightly increasing and listing prices showing a slight decrease. Months of housing supply is at 3.5 months and increasing which suggests supply to be in balance with demand. Median DOM is under 90 days and stable from the previous columns, marketing time is reported to be under 3 months. Analysis and statistics are consistent to with the 1004 mc form and the stated search criteria.

The typical/predominate buyers within the market area would appear to be owner occupants however due to the large number of distressed cash sales, investor purchases are becoming more predominate.

Per GLVAR Press release dated April 6, 2016: Southern Nevada's housing supply remained tight while local home prices and sales increased in March compared to one year ago, the Greater Las Vegas Association of REALTORS® (GLVAR) reported Wednesday.

GLVAR reported the median price of existing single-family homes sold in Southern Nevada during March through its Multiple Listing Service (MLS) was \$220,000. That was up 7.3 percent from \$205,000 one year ago.

Meanwhile, GLVAR said the median price of local condominiums and townhomes, including high-rise condos, sold in March was \$118,000. That was up 2.6 percent from \$115,000 one year ago.

"The local housing market continues to be as stable as it has been in many years," said 2016 GLVAR President Scott Beaudry, a longtime local REALTOR®. "Local home prices have been hovering around \$220,000 for months. On the other hand, we're still dealing with a very tight housing supply. This tight inventory might be keeping prices up, but it makes it harder for buyers to find the right home for them."

According to GLVAR, the total number of existing local homes, condominiums and townhomes sold in March was 3,488, up from a strong showing of 3,358 in March of 2015. Compared to the same month one year ago, 2.8 percent more homes and 8.3 percent more condos and townhomes sold in March.

So far this year, Beaudry said local home sales are ahead of the pace from 2015, when GLVAR reported a total of 38,578 single-family home, condominium, townhome and high-rise condo sales. That was more than in 2014, but fewer sales than during the previous five years.

At the current sales pace, he said Southern Nevada now has less than a three-month supply of homes available for sale, when a six-month supply is considered to be a balanced market.

The total number of single-family homes listed for sale on GLVAR's MLS in March was 13,429, down 0.8 percent from one year ago. GLVAR tracked a total of 3,572 condos, high-rise condos and townhomes listed for sale on its MLS in March, down 1.1 percent from one year ago.

By the end of March, GLVAR reported 7,214 single-family homes listed without any sort of offer. That's down 0.6 percent from one year ago. For condos and townhomes, the 2,304 properties listed without offers in March represented a 5.8 percent decrease from one year ago.

GLVAR continued to report declines in distressed sales and a corresponding increase in traditional home sales, where lenders are not controlling the transaction. In March, 5.9 percent of all local sales were short sales – when lenders allow borrowers to

Supplemental addendum

File No. Fha #332-6343683-703

Borrower	Blong, John P & Blong, Stephen/Fha #332-6343683-703				
Property Address	689 Haunts Walk Ave				
City	Las Vegas	County	Clark	State	NV
				Zip Code	89178
Lender/Client	Venta Financial Group				

sell a home for less than what they owe on the mortgage. That's down from 8.3 percent of all sales one year ago. Another 7.1 percent of all March sales were bank-owned, down from 9.3 percent one year ago.

The median price of single-family homes sold as part of a short sale in March was \$190,750, up from \$165,000 one year ago. The median price of bank-owned homes sold in March was \$180,038, up from \$163,500 one year ago.

Beaudry said short sales may continue to be an attractive option for some homeowners in 2016 since Congress voted in late December to again extend the Mortgage Forgiveness Debt Relief Act of 2007, as REALTORS® advocated. If Congress had not voted to again extend this tax break to help distressed homeowners, any amount of money a bank wrote off in agreeing to sell a home as part of a short sale would have been taxable when sellers file their federal income taxes.

GLVAR said 27.7 percent of all local properties sold in March were purchased with cash, down from 32.4 percent one year ago. That's well short of the February 2013 peak of 59.5 percent, indicating that cash buyers and investors are still more active in Southern Nevada than in most markets, but that their influence continues to wane.

These GLVAR statistics include activity through the end of March 2016. GLVAR distributes such statistics each month based on data collected through its MLS, which does not necessarily account for newly constructed homes sold by local builders or for sale by owners.

Site Comments: The subject site is approximately 3,485 sf and fronts Haunts Walk. The size of site is typical for its area. The shape is rectangular. The view is residential/mountain. No visible easements, encroachments or other conditions were noted. However, inspection was made without the benefit of a title report or survey.

The elevation/topography of the dwelling is adequate and promotes surface drainage at the time of inspection. However, seasonal variations may occur and surface drainage conditions are unknown, as well flood maps often lack sufficient detail to enable accurate determinations on the part of the appraiser.

Highest and best use: The highest and best use of a property is defined as:

1. The reasonable and probable use that supports the highest present value of vacant land or improved property as defined as of the date of this report.
2. The reasonably probable and legal use of land or sites as though vacant, found to be physically possible, appropriately supported financially feasible and that results in the highest and present land value.

The subject conforms to the immediate area. The subject's structure, in our opinion, represents the highest and best use of the site, at this time. The highest and best use of the subject property appears to be "Single Family - Pud Residential".

Hazardous materials: Unless otherwise stated in this report, the existence of hazardous materials, which may or may not be present on the property, was not observed by the appraiser. The appraiser has no knowledge of the existence of such materials on or in the property. The appraiser, however, is not qualified to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation or other potentially hazardous materials may affect the value of the property. The value estimated is predicated on the assumption that there is no such material on or in the property that would cause a loss in value. No responsibility is assumed for any such condition or for any expertise or engineering knowledge required to discover them. The client is urged to retain an expert in this field, if desired.

Insulation: Since it is common for insulation to be concealed and unless otherwise stated in this report, it is believed that the subject property was built to code with regards to insulation, at the time of its construction.

Attic: A head and shoulders inspection of the attic was completed from the scuttle entry door. The insulation appears to be adequate and no visible defects related to the attic were noted.

Foundation walls, exterior walls and roof surfaces: A visual inspection from ground level of foundation walls, exterior walls and roof surfaces was made, which all appear to be in average and typical observable condition. The reader should be made aware that significant portions of these items are hidden from view and even under the best conditions the appraiser can only view surface areas only. Many of the problems related to foundations, exterior walls and roofs are internal and thus hidden from the appraisers view. Please note limited condition 5 on page 4. If further assurance is needed for the condition of these items an inspection by a licensed professional in those fields is recommended. The appraiser was not supplied with a copy of home inspection. Home inspections mention everything they believe are in need of repair. If the home inspection does mention items that are in need of repair that has an influence on value or marketability, then this appraisal would be subject to the repair of these items with the appraisers right to make corrections to the report.

Subject Improvements: The subject property is a 2 story detached residence approximately 9 years. The floor plan has a average to good traffic pattern. The quality of construction is considered to be average and consistent with other dwellings in the area. Maintenance and condition of the improvements are considered to be in overall average condition. The subject property has some nice features which include:

Exterior:

full landscaping
blockwall fencing
exterior lighting
concrete patio
built-in barbecue with tile bar
2-car garage with automatic door
water softener
water heater with earthquake straps

Interior:

leaded etched glass entry door
newer laminated wood flooring throughout beside bathrooms and laundry
tile flooring at baths
raised panel interior doors
intercom system throughout

Supplemental addendum

File No. Fha #332-6343683-703

Borrower	Blong, John P & Blong, Stephen/Fha #332-6343683-703				
Property Address	689 Haunts Walk Ave				
City	Las Vegas	County	Clark	State	NV Zip Code 89178
Lender/Client	Venta Financial Group				

wood plantation shutters throughout
newer interior paint
newer baseboards
corian kitchen counters with bar
stainless steel undermount sink kitchen
stainless steel upgraded kitchen appliances
upgraded kitchen cabinetry with hardware and crown molding
reverse osmosis at kitchen sink
w/i pantry at kitchen
4 built-in speakers at loft
cultured marble vanity top and wainscoting at bath
dual sinks at master bath
garden tub with separate shower at master bath
glass block window at master bath
w/i closet at master bedroom
etc. (see pictures)

These features enhance the value and marketability of the subject property and appear to be proper and typical improvements.

No value was given to personal property.

The appraiser has made an interior inspection of all readily accessible areas of the subject improvements. The appraiser has not moved personal property such as furniture, rugs, carpeting, wall covering, window coverings, etc in this inspection and has reported all readily observable conditions, upgrades, and/or deficiencies that are noticeable and discernible during the typical inspection. The appraiser is not responsible for items or deficiencies that are not readily observable and/or if current home owner made an attempt to obstruct deficient items. If there are items and/or deficiencies that would influence the value that were not mention or noted within this report the appraiser reserves the right to make the necessary corrections to this report.

FHA conditions and comments: The subject property meets the minimum Fha/Hud requirements as set forth in the 4000.1 handbook. The appraiser operated the plumbing, heating, and electrical systems to determine if they are operational however, appraiser is not responsible for testing the functionality or capacity of these systems. The appraiser is not a licensed home inspector and makes no false representation to be one. Home inspections mention everything they believe are in need of repair and not entirely focused on Fha standards and/or requirements. If the home inspection does mention items that are in need of repair that is an Fha requirement, then this appraisal would be subject to the repair of these items with the appraisers right to make corrections to the report.

Appraisals performed for HUD/FHA are not intended to protect the buyer; they protect HUD. Many homebuyers mistakenly believe that a HUD appraisal and subsequent inspection is a guarantee that the property is free from defects when, in fact, the appraisal only establishes the value of the property for mortgage insurance purposes. Buyers need to secure their own home inspection through the services of a qualified inspector and satisfy themselves about the condition of the property.

Sales Comparison Analysis: Typical buyers in the subject price range will consider and compare homes within several miles in all directions from the subject property. All 5 comparable sales and 2 listings are in the subject's competitive market area and utilized within this report as they are considered to be the most appropriate for comparison to the subject property as of the effective date of this assignment. The selected sales were adjusted to reflect the market's reaction to the variables. The appraiser believes that the comparable sales used in the analysis are the best available, as well as the best indicators of value for the subject property.

Final reconciliation: The income approach was not applicable or necessary for this report due to the limited sales date of rental properties that would derive a reliable GRM. Due to the age of subject the cost approach has no credence in this report. Major reliance and consideration is placed on the sales comparison approach as this approach best reflects the behaviors and action of the buyers and sellers in the market.

All 5 selected comparable sales and 2 listings are in the subjects' competitive market area and utilized within this report as they are considered to be the most appropriate for comparison to the subject property as of the effective date of this assignment. All positive and negative adjustments of the comparable sales were required in areas of dissimilarity to produce the best indicated value of the subject. Comparable sales #1 and #4 are the most recent model match sales located within the subject's subdivision. Comp #1 is however inferior in condition and upgrades having little to no updates with standard carpeting and cabinetry. Comp #4 is superior in concessions; inferior in being adjacent to the neighborhood through street of Huntington Cove. Comparable sales #2 and #5 are additional sales located within the subject's subdivision that are slightly superior in living area with comp #2 also superior in lot size and comp #5 superior in concessions, and covered patio/balcony. Comp #3 is the most recent similar sale located within the closest competitive subdivision that has homes similar in size, style, age, and quality. This sale is superior in concessions and covered patio. Most weight is given to comps #1, #2, and #3. Comps #4 and #5 are slightly dated and given least weight. The opinion of value falls within the original and adjusted sale prices of the comparable sales provided.

Please note: The information that was extracted from the local mls is considered reliable and consistent with "normal course of business" of local peer group. The accuracy of the data is dependent upon the accuracy and timeliness of the data provided by the users of the mls system. The appraiser is aware of, and has access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax records, tax assessment records, public land records, Greater Las Vegas Association of Realtors and other data sources for the area in which the property is located. Information furnished to the appraiser by other parties and expressed in this report are from reliable sources that the appraiser believes to be true and accurate. If and when conflicting information is provided, the source deemed most reliable has been used. Data believed to be unreliable has not been included in the report. The appraiser believes this report to be complete and accurate and reserves the right to make any corrections or changes should any errors be discovered.

It should be noted that no employee, director, officer or agent of the lender, or any other third party acting as a joint venture partner, independent contractor, appraisal management company, or partner on behalf of the lender has influenced or attempted to influence the development, reporting, result and/or review of this assignment through coercion, extortion, collusion, compensation, instruction, inducement, intimidation, bribery or in any other manner. I have not been contacted by anyone other than the intended user (lender/client as identified on the first page of the report), borrower, or designated contact to make an appointment to enter the property. I agree to immediately report any unauthorized contacts either personally by phone or electronically. **End of addendum.**

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

Firrea Addendum**1. Effective date of valuation**

The effective date of the appraisal is May 24, 2016 which coincides with the date of valuation included in the report. Other dates as they apply will be mentioned in this report.

2. Purpose of the appraisal

The purpose of this report is to estimate the market value of the subject property as defined herein. This estimate is to be used solely by the client as a basis for a lending decision.

3. Scope of the appraisal

The following steps were taken in arriving at the final estimate of value included in the appraisal report of the subject property.

(a) after receiving the assignment, a preliminary search of all available resources was made to determine market trends, influences and other significant factors pertinent to the subject.

(b) a physical inspection of the property was performed. Although due diligence was exercised while at the subject, the appraiser is not an expert in such matters as pest control, structural engineering, hazardous waste, etc., and no warranty is given as to these elements. As needed, inspections by various professionals within these fields might be recommended with the final estimate of value subject to their findings.

(c) a second review of the data was then performed with the most relevant factors extracted and considered. Market factors were weighted and their influences on the subject property was determined.

(d) the appraisal report was then completed in accordance with standards dictated by the appraisal foundation and lender guidelines. The report included all data and information needed to lead an informed reader to a similar value conclusion.

(e) the appraisal report was then delivered to the client, which constituted the completion of the assignment.

4. Competency of the appraiser

The appraiser has the appropriate knowledge, education and experience to complete this assignment competently. A list of education, experience and knowledge is either attached, on file with the client or will be furnished upon request. However, should any error or omission be subsequently discovered, the appraiser reserves the right to correct it.

5. Uspap

My analysis, opinions and conclusions were developed and this report has been prepared in conformity with the uniform standards of professional appraisal practice (uspap). The departure provision of uspap was not utilized in preparation of this report.

6. Rents and vacancies

Any current income produced by the subject is disclosed and analyzed in the report. Any analysis discussed in this report is based on current, supportive market rents.

7. Trend analysis

A trend analysis reflects the subject market area presently has average market conditions regarding marketability with any deviations noted and discussed in the report/analysis.

8. Deduction and discounts

Any deductions and discounts of the subject market location are disclosed and discussed in the report/analysis.

9. Prohibited influences

The appraisal assignment was not based upon a requested minimum valuation, specific valuation or approval of a loan.

10. Summary

This appraisal report is intended to be a summary document containing information necessary to enable a competent reader to understand the appraiser's opinion. Any third party studies referred to such as pest, dry rot, hazardous materials, structural reports etc. Have been reviewed by the appraiser as submitted to the extent the assumptions and conclusions are used.

Borrower	Blong, John P & Blong, Stephen/Fha #332-6343683-703					
Property Address	689 Haunts Walk Ave					
City	Las Vegas	County	Clark	State	NV	Zip Code 89178
Lender/Client	Venta Financial Group					

11. Personal property

Any personal property involved in the transaction has been excluded from the valuation of the real property. Should a transaction which includes personal property of sufficient value effect the market value of the real property be evident, a separate assessment of the personal property, fixtures or intangible items will be included with the report as a separate valuation.

12. Three approaches to value

The appraiser had made reasonable effort to employ the three recognized approaches to value. As single family residences are not commonly purchased for investment purposes, the use of the income approach will only be used:

(a) at the request of the client on non-owner occupied residences.

(b) when sufficient market evidence exists in a market area to indicate that rental property or investor purchased are typical, measurable and the analysis of it adds value to the appraisal process.

If the income approach is not used it is considered to be less indicative and reliable than the cost approach or sales comparison analysis approach, due to the lack of sufficient, reliable or supportable information.
